

WOUND CARE

DO NOT remove any dressing placed by the emergency room staff unless directed otherwise.

Should you have drainage or bleeding through the dressing, reinforce the dressing with additional bandage material.

Notify your doctor if:

- A fever of 101 or more that lasts longer than 24 hours
- Streaking occurs above the wound
- You are unable to stop bleeding with direct pressure and elevation
- Unusual coolness, paleness (loss of color or pallor) or swelling occurs
