

Bon Secours St. Francis is a Magnet[®] Hospital

Why this is important to YOU!

Magnet is a prestigious, international recognition, considered the gold standard of nursing, which only about 7% of US hospitals have achieved.

Bon Secours St. Francis is the first and only Magnet Hospital in the Lowcountry.

Magnet status is a difficult recognition to receive and hospitals must reapply every four years.

Magnet demonstrates our commitment to engaging and empowering our nurses, which leads to happier nurses and ultimately happier, better cared for patients.

It's called Magnet because Magnet Hospitals attract the best nurses who stay.

Patients at a Magnet Hospital have a decreased risk of falls, pressure ulcers and other complications.

Achieving Magnet is ultimately all about YOU! We always want to provide YOU with the best care possible.
